Soft-Touch Switch Panel

The Krone™ Series switch panel uses deconstruction and fusion design techniques to superimpose and integrate different materials, colors, and shapes into a perfect match, creating an ultra modern stylish switch panel. The button layout is compact, and the visual focus is on the center line. The metal multi-color elements match the square buttons, creating an integrated space Sophistication. A timeless design suited for customer with a great sense of texture and eye for detail.

Small Process Button Design

The panel surface is brushed with metal chaotic lines, with a small square button made of PC material, which combines classic retro with modern elegance. The buttons are designed with light touch structure, which is soft and silent.

With precision manufacturing process and detail quality control, the switch panel brings forward a new experience beyond imagination. A poignant design choice for any modern neutral space.

Patented Backlit Technology

The backlight characters or icons on the button display different light colors according to the switch status. It is white when it is turned on and orange when it is off. Its presence felt through innovative, minimalistic and timeless design.

A Fusion Design With Irresistible modern appeal

The switch panel design is based on a fusion of contemporary and retro inspiration. Whether it is a narrow corridor or a spacious space, the switch panel reveals the energy of various vitality that matches the environment décor.

A Timeless Design That Last

With a minimal design, this stylish electrical switch panel was created with the purpose of intensifying the relationship with the environment where it is installed.

the panel is composed of a metal, which absorbs and moulds itself around the plastic buttons held within the panel, subsequently taking on new shapes, influenced by the environment decor.

A well-executed concept that results in a timeless piece of product that never goes out of style.
